AUGMANITAI

Andreas Ehstand

What changes when people use AI to make decisions, learn and work together?

Andreas Ehstand is the founder of AUGMANITAI, an independent researcher and author. His work connects human–AI collaboration, knowledge continuity, agents and robotics. He is an AI Future Council Member at the Swiss Future Institute and is listed in the BVMID expert directory for IT and artificial intelligence.

01 When AI sounds convincing

How leadership teams retain judgement and responsibility. For strategy and leadership events: plausible answers, verification and the human decision.

02 What remains when experience leaves?

Passing on knowledge and the reasons behind decisions. For companies, succession and knowledge work: the difference between a recorded decision and understandable reasoning.

03 From a single prompt to human–AI–robot teams

How roles, language and handovers shape collaboration with machines. For innovation and technology events: public research questions and examples from working with AI and agents.

Contact

Planning an event, interview, editorial contribution or book project about people and AI? Contact Andreas Ehstand with the occasion, audience, preferred format, language and approximate time frame. The topic and possible scope are discussed personally.
